

C.I.F.: B-36.257.442

Dear Sir/Mme, we are contacting you to let you know - in a very concise way - about the know-how of our company and to offer you our professional services. For further information, please visit our website or contact us by any of the means provided at the end of the letter: telephone, fax, email, mail, etc. We will gladly assist you.

Maimbar, a long industrial history

Our company has operated since 1979 in designing and manufacturing industrial machinery for various business sectors, among others, for companies from the 1st and 2nd woodworking sector, aluminum extrusion companies or companies specializing in granite cutting, etc.

Throughout these years we have adapted to all the technological changes. Nowadays, we apply in our production line, cutting-edge technologies that have enabled us to greatly improve the final quality and performance of the machines we manufacture. This allows us to offer a service combining the highest quality with competitive prices.

At Maimbar you can count on a Technical Department for the Development and innovation of our products, a highly qualified staff, pneumatic, hydraulic and electrical installation. Moreover, our company offers the service of an after-sales technical department which ensures the installation and operation of our machines, since the beginning, and with the maximum success for your business.

We develop machine vision applications, static and continuous weighing with a tolerance range of ± 0.2 gr. for classifying products and electronic programmes tailored to each project.

We specialize in industrial design and manufacture with a wide range of materials (nylon, PVC, steel, polyamide, delrin, Arnite, Teflon, Celotex, polypropylene, brass, bronze, aluminum, etc.).

Maimbar means: for specific problems, specific solutions, tailored to the production needs of each client.
